Tourist site enhancement with local community participation

SHIBDERAZ village in QESHM Island in southern IRAN

NIMA AZARI
(THE MANAGER OF PROJECT)

GLOBAL ECO CONFERENCE
7 NOVEMBER 2011  SYDNEY AUSTRALIA
Annually hawksbill turtles come to Qeshm Island in the southern of IRAN particularly SHIBDERAZ beach to lay eggs.

This turtle is in IUCN (International union of conservation of nature) red list. Its status: “critically endangered”

Previously the local community considered the eggs as a kind of food.
- A 3 phase project was launched since 2001 cooperating with local community volunteers to protect the turtles from extinction.

- The project supported by UNDP/GEF/SGP (UNITED NATIONS DEVELOPMENT PROGRAMM / GLOBAL ENVIRONMENT FACILITIES / SMALL GRANTS PROGRAMM)
The following are the project phases:

- **Phase 1:** conservation: a great number of turtle hatchlings could get to the sea.

- **Phase 2:** ecotourism: the main goal was to manage and develop ecotourism in Shibderaz based on turtle’s attraction.

- **Phase 3:** ladies enhancement project: the ladies in village got together to both conserve the endangered turtle as well as revitalize their local handicrafts.
Qeshm island

Qeshm is Persian Gulf biggest island in southern IRAN

Its length: 130 km

Qeshm island is neighboring to Hormoz straight with the short distance from IRAN mainland. Hormoz, Hengam and Larak islands are near Qeshm.

Qeshm looks like a dolphin in appearance and contrary to other islands of the area it is a mountainous one.
Qeshm is a geomorphologic island with many erosive attractions. Such as Chahkuh straight, Star valley and so on.

The world largest salt cave with 6600 meters length has been discovered in Qeshm island.

The ending half of the island has been registered as the only Middle East Geopark by UNESCO in 2007.
The typical flora and fauna of island calls “nubo-sindian” has some species like palm, acacia and so on.

Mangrove forest is a typical plant type of the area and a large and important habitat for many species.
About fauna: Qeshm has the world biggest (Wales) and the smallest (little shrew) mammals in size.

Qeshm is a proper inhabitant for some immigrant and native birds like gull, tern, and plover and so on.

- Gazelle is also a well-known mammals of the island.
A considerable number of dolphins absorb a great number of tourists.
Throughout the history, Qeshm was closely connected to the neighboring countries and developed a number of cultural and social ties.

Qeshm typical culture is manifested in their language, accent, dressing, architecture, customs and conventions.

they had a great and traditional business with neighboring countries like India, Oman, united Arab emirates, as well as African countries like Kenya, Tanzania and Madagascar.
Qeshm combines nature and culture to be considered as the one of the great destination for tourists particularly ecotourists.
Turtles

Hawksbill turtle the smallest turtle of the marine species lives in the Persian Gulf and Oman Sea.

It is one of 8 species in the world and one out of five in Persian Gulf.

Its habitat is reef islands and their main food is soft reefs. Its status is “critically endangered “in IUCN red list.
The dangerous:
- Local dwellers interest in their eggs.
- Foxes and dogs

The time of egg laying: from march till end of may

hatching time: the beginning of June to end of July. (It takes 45-70 days)

Special features:
- The female can lay eggs after 30.
- Intrinsically they can just lay egg on the same beach they were born on.

Hatchlings weight: 20 gr and their length: 5 cm
One out of 1000 can get to the puberty after 30 years.
SHIBDERAZ village

Geographical location:
- Southern beach of central part of Qeshm Island.
- 2 km away from Hengan island in north.

Attractions:
- watching the dolphins.
- Pristine coral reefs.
- A proper habitat of turtles (green and hawksbill)

The village:
- Population: 450
- Most villagers are fisherman and goods traffickers.
- The village does not enjoy enough of facilities and Infrastructures.
TOURIST SITE ENHANCEMENT WITH LOCAL COMMUNITY PARTICIPATION

SHIBDERAZ TURTLES BEACH
Phase 1: conservation project

The supporters and stakeholders:
