(Ankara, Turkey, 17-18 May 2016)

IDB WTO-RELATED TECHNICAL ASSISTANCE AND CAPACITY BUILDING PROGRAM

I. INTRODUCTION

The IDB WTO-related Technical Assistance and Capacity Building Program (WTO-Program) was launched in 1997 and has now been under implementation for more than fifteen years. The IDB has regularly submitted progress reports on the implementation of this program to the COMCEC meetings. The last report was submitted to the 30th Session of the COMCEC. This report highlights the major WTO-related technical assistance activities undertaken under this program since the 31st Meeting of the Follow-up Committee of the COMCEC held on 13-14 May 2015, in Ankara, Turkey.

The IDB launched the WTO-Program with the prime objective of helping its member countries upgrade their human and institutional capacities to adjust to the new multilateral trading system. The aim of the Program is to provide greater awareness to the OIC member countries on WTO Agreements and their implementation and facilitate the process of their accession to the WTO. It also serves as a forum where relevant officials from member countries can exchange views and discuss various multilateral trade matters. In the recent years, the focus of the Program has been more on helping the member countries in their accession to WTO, strengthening their negotiation skills and issues related to negotiations within the framework of the Doha Work Program.

The main objectives of this Program are to: (i) assist member countries that are in the process of accession to WTO to negotiate the best possible terms of accession; (ii) upgrade the human and institutional capacities of member countries that are already members of WTO to implement the Uruguay Round Agreements and undertake the necessary economic restructuring to take maximum advantage of the new opportunities; and (iii) assist member countries in harmonizing their positions and to be well prepared for negotiations on new trade-related issues that are likely to emerge in future Ministerial Conferences of the WTO.

II. MAJOR ELEMENTS OF THE PROGRAM

The main elements of the IDB Group's WTO Program include: organizing seminars and workshops on WTO agreements; conducting technical courses on Trade Policy; organizing Consultative Meetings on important issues and in preparation for the WTO Ministerial Conferences; undertaking WTO-related studies; and providing advisory services through financing of experts/consultants to member countries on WTO-related matters. Briefly, the activities that have been undertaken under the IDB Group's WTO Program since its inception are as follows:

Seminars and Workshops: The IDB organizes seminars and workshops covering a wide range of WTO issues with the view to familiarizing the member countries with the contents and provisions of the WTO Agreements as well as the activities of WTO so that they may be in a better position to defend their interests. Since its inception till end-April 2016, 87 Seminars and 44 Workshops have been organized by the IDB under this program.

Trade Policy Courses: Organized in collaboration with the WTO, these courses are short versions of the WTO Trade Policy Course which is a three-month course offered

by the WTO in Geneva. The Trade Policy Course covers a wide range of topics, such as, market access, customs and trade administration, agriculture, textile and clothing, sanitary and photo-sanitary measures, technical barriers to trade, government procurement, general agreements on trade in services, intellectual property rights, anti-dumping, subsidies and countervailing measures, dispute settlement, agreement on trade-related investment measures, trade and competition policy, trade and environment, and regionalism. Since the inception of the Program till end-April 2016, 21 Trade Policy Courses have been organized by the IDB under this program.

Special Studies: The IDB occasionally undertakes in-depth studies on WTO-related issues based on the requests of the member countries. So far, the IDB has undertaken studies on: Agriculture sector, Investment, Services sector, Trade-related Aspects of Intellectual Property Rights (TRIPs), and Electronic-Commerce. Each study included a set of case studies on OIC member countries and contained valuable practical tips and negotiation strategies on the various issues concerning the OIC member countries.

Consultative Meetings: The IDB organizes consultative meetings for the member countries mostly in conjunction with the WTO Ministerial Conferences. These meetings provide a forum for the delegations of member countries to exchange views and, where possible, coordinate their positions on matters related to the WTO, adopt a common stance and act as a group to acquire stronger bargaining power. So far, the IDB has organized nine consultative meetings for both capital-based and Geneva-based officials.

WTO Specific Technical Assistance to OIC Member Countries: The IDB also provides specific technical assistance to member countries through hiring consultancy services or fielding in-house WTO experts on vital WTO issues such as, WTO accession, drafting of national laws, establishing WTO Units and providing capacity building for all general purposes.
