ANNUAL REPORT ON TRADE AMONG THE OIC MEMBER STATES EXECUTIVE SUMMARY

I- LATEST DEVELOPMENTS IN THE GLOBAL ECONOMY:

According to IMF data (January 2019), the global growth forecast for 2019 and 2020 decreased due to the negative effects of tariff increases enacted in the United States and China at the beginning of 2019 and reinforced by Germany introduction of new automobile fuel emission standards, natural disaster in Japan and Italy concerning sovereign and financial risks which contributed to enhance domestic demand but also weakening financial market in some emerging countries. Global growth in 2018 was estimated at 3.7% and projected to decline to 3.5% in 2019 before picking up slightly to 3.6% in 2020.

In fact, this growth pattern reflects a persistent decline in the growth rate of advanced economies and temporary decline in the growth rate for emerging market and developing economies in 2019, reflecting contractions in Argentina and Turkey, as well as the impact of trade actions on China and other Asian economies. Specifically, growth in advanced economies is projected to slow from an estimated 2.3 percent in 2018 to 2.0 percent in 2019 and 1.7 percent in 2020 according IMF Projections. Growth in emerging and developing Asia will dip from 6.5 percent in 2018 to 6.3 percent in 2019 and 6.4 percent in 2020 and in the Middle East, North Africa, Afghanistan, and Pakistan region is expected to remain subdued at 2.4 percent in 2019 before recovering to about 3 percent in 2020. In sub-Saharan Africa, growth is expected to pick up from 2.9 percent in 2018 to 3.5 percent in 2019, and 3.6 percent in 2020. And in the Commonwealth of Independent States is projected to expand by about 2¹/₄ percent in 2019–20.

This trend is due also to the volatility of crude oil, food, mining products prices since August 2018, reflecting supply influences, including US policy on Iranian oil exports and, more recently, fears of softening global demand. Indeed, as of early January, crude oil prices stood at around \$55 a barrel, and markets expected prices to remain broadly at that level over the next 4–5 years. Besides, prices of metals and agricultural commodities have softened slightly since August, in part due to subdued demand from China. Consumer price inflation has generally remained contained in recent months in advanced economies but has inched up in the United States, where above-trend growth continues. Among emerging market economies, inflationary pressures are easing with the drop in oil prices.

This situation can be explained, among other things, by the existence of favourable financial environment that have enabled investment in manufacturing, the flexibility of fiscal policy in the US but also the rise in world prices for commodities (oil, natural gas, metals (aluminium and iron) and agricultural products (grains and oilseeds) and private consumption flows particularly in China and India.

Given this situation, the OIC countries are not left behind, the overall GDP of the Member has increased from USD 18.3 trillion in 2016 to USD 19 trillion in 2017 and may reach a value of USD 19.8 trillion in 2018 given the soaring of some commodity prices and the

international economic environment.

In 2018, a GDP growth above 5% was recorded in the following countries: Guinea, Côte d'Ivoire, Turkey, Tajikistan, Djibouti, Senegal, Bangladesh, Turkmenistan, Burkina Faso, Maldives, Malaysia, Guinea-Bissau, Benin, Pakistan, Mali, Uzbekistan, Niger and Indonesia.

II- WORLD TRADE:

Global trade of goods and services remained relatively resilient this year despite US protectionist rhetoric. In 2019, trade momentum is set to soften to +3.6% in 2019 in line with softening of global growth. Protectionism will stay under control but further escalation to a trade feud (average US tariffs above 6%) could cost half a point of GDP in growth; a trade war (average US tariffs above 12%) would cost two points of GDP and a global recession.

Global merchandise exports could grow by 10.4% this year, hitting almost \$19.6 trillion, according to the UNCTAD Handbook of Statistics 2018, published on 5 December 2018.

According to the WTO and the IMF's 2018 reports, global trade in 2017 has grown strongly compared to 2011, which has enabled growth in world GDP and job creation, due to multilateral cooperation and regional economic integration supported by trade diplomacy. Indeed, in 2017, world trade grew by 4.7% against 1.8% in 2016, i.e. more than twice the level in 2016 following the increase in investment expenditure, the rise in commodity prices, the exchange rates in USD, increased imports particularly in Asia but also expansionary fiscal policies and investment in the energy sector in the US and in some other countries.

The value of global trade (current US dollar) in 2017 grew by 10.7% for exports of goods and 7.4% for commercial services exports. Imports from developing countries jumped from 1.9% in 2016 to 7.2% in 2017 and exports respectfully by 5.2% and 6.4%. Asia experienced the strongest growth in trade volume of all regions in 2017, for both exports (6.7%) and imports (9.6%). North American exports and imports increased significantly in 2017 recording 4.2% and 4.0%, respectively, after stagnating in 2016.

The Import growth in South and Central America and the Caribbean reached 4.0% in 2017. At the same time, European trade flows continued to grow at a moderate pace, with a 3.5% increase in exports and 2.5% in imports in 2017. The countries of Africa, the Middle East and the Commonwealth of Independent States recorded steady export growth of 2.3% in volume.

In 2018, global trade growth could reach 4% to 4.4% in 2019 according to WTO forecasts of May 2018, however, it may experience a regression following trade tensions between the US, Europe and Asia on the issue of steel and aluminium, which could affect business confidence over the decisions of their investment.

According the DOTs IMF data as March 2019, world exports reached USD 18.97 Trillion in 2018 against USD 17.4 Trillion in 2017 i.e a rate growth 9.02% and imports grew from USD 17.47 Trillion in 2017 to USD 19.13 Trillion in 2018 i.e an increase of 9.48% due to the fluctuations of commodities prices and dollar USD.

III- RECENT DEVELOPMENTS IN FOREIGN TRADE OF OIC MEMBER STATES:

a) New OIC Ten Year Plan of Action (OIC-2025):

At the 13th Islamic Summit of April 2016 held in Istanbul in the Republic of Turkey, a New

Ten-Year Plan of Action was adopted aiming at achieving a 25% intra-OIC trade share by 2025 (OIC -2025) covering the period 2016-2025.

In this regard, the OIC General Secretariat has initiated an Annual Coordination Meeting of OIC Institutions (ACMOI) every December starting from the end of 2015.

During the first meeting held in December 2015, two subcommittees were created: a subcommittee on Trade and Investment (TISC) under the chairmanship of the Islamic Centre for Development of Trade (ICDT) and another on the development of the Private Sector and Finance under the direction of the Islamic Development Bank Group.

Thus, the TISC subcommittee organized 4 meetings (16-17 March 2016 in Marrakech, 6-7 March 2017 in Casablanca, 8-9 March 2018 in Marrakech and 1st April 2019 in Marrakesh) of the OIC institutions dealing with trade and investment and technical meeting in Jeddah at ITFC headquarters to coordinate the activities of the Member Institutions (27 May 2016 and 9 February 2017).

Five integrated projects have been initiated namely: development of Halal Industry, the Single Window Initiative and Trade Facilitation, the development of strategic products; Investment Promotion and Support for Investment Promotion Agencies of OIC Member States, private sector and SMEs development.

For this purpose, Trade Fairs, Specialized Exhibitions, Business Fora and Buyers Sellers Meetings were organized jointly by ICDT, ITFC and SMIIC as well as capacity building programs by ICDT, SESRIC and IDB between 2017 and 2019.

b) OIC countries global trade:

Efforts made by Member States, OIC Institutions and development partners have contributed to the improvement of the volume of foreign and intra-OIC trade despite fluctuations in commodity prices and the parity of the US dollar against local currencies as well as the geopolitical and economic situation of the OIC countries.

The share of OIC Member States in world trade accounted for 9.4% in 2017 compared to 11% of world trade in 2014, i.e. a decrease by 14.4%. The volume world trade of the OIC countries went from USD 4.2 trillion in 2014 to USD 3.2 trillion in 2017 i.e. a 22% decline.

The main foreign trade actors of the Member States in 2017 are: Malaysia, Turkey, United Arab Emirates (UAE), Saudi Arabia, Indonesia, Iran, Iraq, Qatar, Egypt and Kuwait. These ten countries totalled USD 2.4 trillion, totalling 72.7% of world trade of Member States in 2017.

The main products marketed by the Member States are composed in 2017 of: Miscellaneous manufactured goods (28%), food products (24%); mineral fuels (21%); transportation machinery and equipment (11%), chemicals (11%) and non - edible raw materials (5%).

c) OIC Member States Global Trade in Services:

According to UNCTAD data of May 2018, the global trade of the OIC Member States in services reached in 2017 a value of USD 900.07 billion against USD 835.6 billion in 2016, representing an increase of 7.7% in transportation services and travel.

Exports of services from OIC Member States totalled about USD 370 billion in 2017 against USD 338 billion in 2016, i.e an increase of 9.4% and imports increased by 6.6% from USD 498 billion in 2016 to USD 531 billion in 2017.

The increase in exports of trade in services is explained by the rise of export services (more than USD 500 million) in the following countries between 2016 and 2017: Egypt, Turkey, Morocco, UAE, Qatar, Malaysia, Indonesia, Nigeria, Saudi Arabia, Jordan, Uzbekistan, Pakistan, Albania and Azerbaijan. The main dominant types of services in the OIC countries are travel and transport services up to 83% in 2017.

The main players in trade in services are: UAE, Saudi Arabia, Malaysia, Turkey, Indonesia, Qatar, Egypt, Kuwait, Morocco and Iran. These ten countries accounted for 80% of the total trade of the OIC countries in 2017.

IV/ CURRENT STATE OF INTRA-OIC TRADE:

a) Volume of intra-OIC trade:

The volume of intra-OIC trade (intra-OIC exports + intra-OIC imports) reached in 2017 a value of USD 644.3 billion against USD 556.3 billion in 2016, i.e. an increase of 15.80%. This situation is explained by the increase of intra-OIC trade by more than USD 500 million between 2016 and 2017 of the following countries: United Arab Emirates, Saudi Arabia, Turkey, Bahrain, Qatar, Kazakhstan, Nigeria, Malaysia, Côte d'Ivoire, Indonesia, Suriname, Azerbaijan, Togo and Guinea.

Intra-OIC exports increased by 15.7% from USD 278.4 billion in 2016 to USD 322.8 billion in 2017 and imports increased from USD 277.9 billion in 2016 to USD 321, 5 billion in 2017, an improvement of 15.7%. In addition, the share of intra-OIC trade increased to 19.8% in 2017 compared to 18.7% in 2016, representing 6% growth. The main players in intra-OIC trade in 2017 are: the UAE; Turkey, Saudi Arabia, Indonesia, Iran, Malaysia, Egypt, Pakistan, Oman and Iraq. These ten countries accounted for 74.6% of intra-OIC trade in 2017 totalling USD 480.7 billion.

At the regional level, the distribution of intra-OIC trade was as follows: 47% ensured by the Gulf countries followed by the Asian countries (24%), the Middle East countries (20%), the Sub-Saharan African countries (5%) and AMU countries (3%). In 2017, about 28 countries reached the 25% threshold of intra-OIC trade targeted by the New Ten-Year Plan of Action (TYPOA) OIC-2025, in descending order: Somalia (58.60% of its trade is done with the OIC countries) followed by Sudan (55.83%), Syria (52.11%), Yemen (51.61%), Afghanistan (51.37%), The Gambia (47.55%), Togo (46.16%), Mali (45.86%), Tajikistan (42.97%), Djibouti (41.95%) %), Jordan (39.76%), Bahrain (39.44%), Lebanon (39.26%), Senegal (36.15%), Oman (35.75%), Sierra Leone (35.55%), Egypt (34.65%), the UAE (33.52%), Iran (32.58%), Kyrgyzstan (29.87%), Pakistan (28.74%), Benin (28.48%), Comoros (27.40%), Niger (26.76%), Côte d'Ivoire (26.57%), Uzbekistan (25.96%), Turkmenistan (25.20%) and Chad (24.88%).

b) Intra-regional trade:

Intra-regional trade reached a value of USD 118.1 billion in 2016 compared to USD 138.7 billion in 2017 corresponding to 17.5% increase thanks to the significant increase in intraregional trade of the GCC countries, Middle East, Asia and sub-Saharan Africa varying between 1 and 12 billion USD.

This intra-regional trade remains concentrated between the GCC countries, the Middle East and Asia up to 92% in 2017. Intra-regional trade flows share accounted for 42.5% of intra-OIC trade in 2016 compared to 43.1% in 2017, a slight improvement of 1.5%, reflecting the revival of intra-regional trade. In contrast, the AMU region experienced a decline in intra-regional trade by 18.4% during this period.

c) Inter-regional trade:

Inter-regional trade volume has experienced the same trend with a creation of interregional exchanges of 15% rising from USD 160.1 billion in 2016 to USD 184.1 billion in 2017 due to the increase in inter-regional trade particularly in the GCC, Asia and the Middle East during this period. The share of inter-regional trade in intra-OIC trade fell slightly by 0.7% from 57.6% in 2016 to 57.2% in 2017.

V/ PREVALENCE OF TARIFF AND NON-TARIFF BARRIERS:

Despite the considerable efforts made by the Member States, the OIC General Secretariat and its Institutions to promote intra-OIC trade and to reduce the barriers, many obstacles remain. According to the latest study conducted by the ICDT, the difficulties encountered by the exporting companies are related to the customs services (76%), then the logistics and the technical barriers with 33% each. Contrary to popular belief, financial difficulties are cited in only 10% of cases.

VI/ TOOLS FOR STRENGTHENING INTRA-OIC TRADE:

To strengthen economic and trade cooperation among the OIC countries, the OIC Institutions and the public and private sectors shall contribute to the implementation of the OIC-2025 Ten-Year Plan of Action in particular through the five integrated projects adopted by the TISC, especially the trade facilitation, capacity building, participation in Fairs, International Exhibitions and Business Fora but also by easing foreign trade procedures and those of intra-OIC investment in order to boost trade between Member States by raising awareness on the establishment of Single Windows for foreign trade and the modernization of customs administrations. In addition, the diversification of the exportable supply is a necessity for developing foreign trade and intra-OIC investment.

It is also important that OIC Member States set up the Free Trade Area and adhere to the guiding principles of investment facilitation.
