

**Possible Questions for Brainstorming Session
First Meeting of the COMCEC Agriculture Working Group
(6th June 2013)**

1. What are the specific lessons learnt from your country's experiences in improving irrigation capacity and introducing efficient irrigation techniques?
2. How can we raise awareness in the COMCEC countries on the growing threat of water scarcity and importance of water use efficiency? How multi-media, printed, audio visual materials, educational activities and social events can be used to that end?
3. For improving irrigation capacity and efficiency in the COMCEC region, what can be possible role of government, private sector, financing agencies, international development institutions, water associations, NGOs, development agencies etc?
4. How can enhance cooperation under the COMCEC umbrella for improving irrigation capacity and efficiency in the region? How can we utilize COMCEC PCM and grants in this regard? i.e. capacity building projects, exchange of experts, networking, sharing of best practices, technical assistance in preparing plans and programmes for improving irrigation capacity and water use efficiency etc?
