108	Calibration of Radiation Thermometers, Thermal Cameras, Blackbodies, and Uncertainty Calculations	SDG9, SDG9-9.1	14.11.2024	Online	SMIIC, TÜBİTAK-UME, NMIs of SMIIC Member States	thermometers, thermal cameras, and blackbody sources, ensuring accurate and traceable temperature measurements. Participants were equipped with calibration techniques, uncertainty evaluation, and compliance with international metrology standards.
109	Calibration of Water Flowmeter and gas flowmeter Using Primary level system	SDG9-9.1	14.06.2025 25.06.2025	Online	SMIIC, TÜBİTAK-UME	Participants gained the knowledge to calibrate water and gas flowmeters using primary level systems. They are able to perform accurate flow measurements and ensure traceability to national and international standards.
110	Calibration of Hardness Rockwell and Vickers Diamond Indenters	SDG9-9.1	14.07.2025 15.07.2025	Online	SMIIC, TÜBİTAK-UME	Participants learned the procedures for calibrating Rockwell and Vickers diamond indenters. They are able to assess indenter performance and ensure compliance with relevant hardness testing standards.

111	The SMIIC project (2024-SMIIC-344), titled “Enhancing the Capacity of Metrology Laboratories for Improved Quality Infrastructure”- COMCEC Project Funding	SDG9-9.1	02.09.2025 03.10.2025	Online, Kampala (Uganda), Gebze (Türkiye)	SMIIC, UNBS, SSMO, TÜBİTAK- UME	The training program aims to strengthen the capacities of the National Metrology Institutes (NMIs) of Uganda and Sudan by addressing priority gaps in their laboratory infrastructure and technical expertise. 12 experts —6 from the Uganda National Bureau of Standards (UNBS) and 6 from the Sudanese Standards and Metrology Organization (SSMO)— participated in the training across six specialized sub-laboratories, namely: - Physics Group: Time-Frequency & Wavelength, Medical Metrology - Mechanics Group: Force Laboratory, Mass Laboratory - Chemistry Group: Organic Chemistry, Bioanalysis The training sessions, which were delivered by six Senior experts from TÜBİTAK National Metrology Institute (UME) of Türkiye, enabled participants to deepen their technical skills and align their work with international metrology standards. The project’s final phase will be carried out in Gebze, Türkiye, with a practical workshop at the TÜBİTAK laboratories.
112	Training on “Calibration of gauge blocks by comparison method”	SDG9-9.1	15.09.2025	Online	SMIIC, UZNM	Aimed specifically at professionals working in dimensional laboratories, the training aimed to equip attendees with the knowledge and practical skills essential for high-precision calibration tasks. 56 Experts from SMIIC Member States National Metrology Bodies/Institutes attended the training.
113	Impedance standards calibration and uncertainty calculation	SDG9-9.1	15.09.2025	Online	SMIIC, SASO	This training taught participants to perform traceable calibration of impedance standards (resistors, capacitors, inductors and network/S-parameter standards), apply appropriate measurement techniques (bridges, vector/network analysis), identify and quantify all significant error sources, calculate combined and expanded measurement uncertainty per the GUM, and generate compliant calibration reports with uncertainty statements and traceability.
114	Training in Dimensional Metrology- External micrometres introduction and calibration methods	SDG9-9.1	29.09.2025	Online	SMIIC, SASO	This training introduced participants to the principles and proper use of external micrometers, along with step-by-step calibration methods to ensure accurate, traceable, and reliable dimensional measurements.
115	Training in Dimensional Metrology	SDG9-9.1	6.10.2025	Online	SMIIC, SASO	This training is expected to equip participants with the fundamental principles, techniques, and calibration methods of dimensional metrology to ensure accurate and traceable measurement of physical dimensions.
116	Training in Dimensional Metrology- Calliper calibration and uncertainty calculations	SDG9-9.1	6.10.2025	Online	SMIIC, SASO	This training is expected to provide participants with the knowledge and practical skills to perform calliper calibration and accurately calculate measurement uncertainties in compliance with metrology standards.

117	Calibration of pH meters using certified reference materials	SDG9-9.1	23.10.2025	Online	SMIIC, SASO	This training is expected to guide participants in the proper calibration of pH meters using certified reference materials to ensure accuracy, reliability, and traceability of measurement results.
118	Traceable Frequency Generation and Measurement	SDG9-9.1	6.11.2025	Online	SMIIC, SASO	This training is expected to provide participants with the knowledge and skills to generate and measure frequencies with traceability to national and international standards, ensuring accuracy, reliability, and consistency in frequency measurements.
119	General calibration of hardness (Brinell)	SDG9-9.1	19.11.2025	Online	SMIIC, SASO	This training is expected to provide participants with the principles and procedures for the general calibration of Brinell hardness testers to ensure accurate, consistent, and traceable hardness measurements.
120	National Time Scale Generation and International Traceability	SDG9-9.1	26.11.2025	Online	SMIIC, SASO	This training is expected to provide participants with the knowledge and skills to understand the generation of a national time scale, its maintenance, and the processes for ensuring international traceability to global time standards.
121	Verification of Non-Auromatic Weighing Instruments (NAWI) according to OIML R76	SDG9-9.1	01.12.2025 15.12.2025	Online	SMIIC, TÜBİTAK-UME	Participants learned to verify Non-Automatic Weighing Instruments (NAWI) in accordance with OIML R76 requirements. They are able to ensure the accuracy, reliability, and compliance of weighing instruments through proper verification procedures.
122	Calibration of Rubber and Plastic hardness measurement devices	SDG9-9.1	15.12.2025 25.12.2025	Online	SMIIC, TÜBİTAK-UME	Participants acquired the skills to calibrate hardness measurement devices used for rubber and plastic materials. They are able to verify device performance and ensure measurements meet applicable standards and quality requirements.
123	Calibration of Rubber and Plastic hardness Measurement Devices	SDG9-9.1	15.12.2025 26.12.2025	Online	SMIIC, TÜBİTAK-UME	This training is expected to equip participants with the knowledge and practical skills to calibrate rubber and plastic hardness measurement devices, ensuring accurate, consistent, and traceable hardness measurements.
124	Preparation and measurement of CRM pH	SDG9-9.1	16.12.2025	Online	SMIIC, SASO	This training is expected to teach participants how to properly prepare and measure Certified Reference Material (CRM) pH solutions to ensure accurate, traceable, and reliable pH measurements.
125	The Role of the Reference Material “a Mixture of Gases” in our daily life	SDG9-9.1	31.12.2025	Online	SMIIC, SASO	This training is expected to explain the importance and applications of reference gas mixtures in daily life, highlighting their role in ensuring accurate measurements, safety, quality control, and compliance across various industries.

126	Measurements/Calibration of Density Meters and liquid samples	SDG9-9.1	12.01.2026	Online	SMIIC, SASO	This training is expected to teach participants how to accurately measure and calibrate density meters and liquid samples, ensuring traceable, reliable, and precise density measurements in accordance with metrology standards.
127	Calibration of Master Viscometers and Viscosity of Oil Standards	SDG9-9.1	19.01.2026	Online	SMIIC, SASO	This training is expected to provide participants with the knowledge and practical skills to calibrate master viscometers and measure the viscosity of oil standards accurately, ensuring traceable and reliable results.
128	Training in Dimensional Metrology-Gauge Blocks by Mechanical Comparison	SDG9-9.1	4.02.2026	Online	SMIIC, SASO	This training is expected to teach participants how to perform dimensional measurements using gauge blocks through mechanical comparison techniques, ensuring accurate, traceable, and reliable calibration results.
129	Impedance Standards and Traceability-Guide No. 3	SDG9-9.1	13.04.2026	Online	SMIIC, SASO	This training is expected to provide participants with guidance on impedance standards and their traceability as outlined in Guide No. 3, covering calibration procedures, measurement techniques, and uncertainty evaluation for accurate and reliable electrical measurements.
130	Absolute Gravity FG5-X	SDG9-9.1	13.04.2026	Online	SMIIC, SASO	This training is expected to introduce participants to the operation, calibration, and data analysis of the Absolute Gravity FG5-X instrument, enabling precise and traceable measurements of gravitational acceleration.
131	Calibration of digital Multimeter and uncertainty calculations based on the Guidelines “Calibration of Digital Multimeters EURAMET cg-15	SDG9-9.1	4.05.2026	Online	SMIIC, SASO	This training is expected to equip participants with the knowledge and practical skills to calibrate digital multimeters and calculate measurement uncertainties in accordance with the EURAMET cg-15 guidelines, ensuring accurate and traceable electrical measurements.
132	Overview of Calibration of Electric Field Probes in the Frequency Range 500 MHz – 18 GHz (FAC Method)	SDG9-9.1	4.05.2026	Online	SMIIC, SASO	This training is expected to provide participants with an overview of the calibration of electric field probes in the 500 MHz–18 GHz frequency range using the FAC method, including procedures, measurement techniques, and traceability considerations for accurate and reliable results.
133	Calibration of Power Meter	SDG9-9.1	4.05.2026	Online	SMIIC, SASO	This training is expected to provide participants with the knowledge and practical skills to calibrate power meters accurately, ensuring traceable, reliable, and precise electrical power measurements.

134	Why Every Metrology Institute Should Have a Gas Measurement Laboratory	SDG9-9.1	31.12.2026	Online	SMIIC, SASO	This training is expected to explain the critical importance of a gas measurement laboratory for metrology institutes, highlighting its role in ensuring traceable gas measurements, supporting calibration services, maintaining standards, and enabling accurate and reliable industrial, environmental, and scientific applications. This training is expected to explain the critical importance of a gas measurement laboratory for metrology institutes, highlighting its role in ensuring traceable gas measurements, supporting calibration services, maintaining standards, and enabling accurate and reliable industrial, environmental, and scientific applications.
