itfccorp International Islamic Trade Finance Corporation (ITFC)

thank you.

Financing Mechanisms.

01

Direct Financing:
ITFC purchases the goods from the supplier, on behalf of the beneficiary, and sells them immediately to the beneficiary with deferred payment arrangement. Title of goods is transferred immediately from ITFC to the Beneficiary.

02

Line of Financing:
It is designed to ultimately benefit SMEs. Banks / FIs act as Intermediary (Agents) between ITFC and the end beneficiaries, whereby ITFC signs Murabaha Agreement with end beneficiary (SME) against a Guarantee from the Bank/FI.

03

Murabaha Financing with FIs:
It is designed to ultimately benefit SMEs. ITFC signs a Murabaha contract with the bank (the bank is the counterparty to ITFC); who signs a second Murabaha contract with the SME.

04

Deferred Murabaha (Structured Commodity Finance):
ITFC purchases the goods and holds the title until it is sold to the beneficiary. The goods may be sold (i.e. transfer of title) in one or several sale transactions to the beneficiary during the financing period.

05

Co-Financing & Syndication:
In this mode of financing, ITFC, acting as a Mudarib (lead arranger or co-arranger), invites one or more Financial Institutions to participate in the financing.

Financing Mechanisms.

06

Salam Financing:
Salam Financing provides pre-harvest and pre-production funding to Merchant Clients, covering agricultural inputs such as seeds and fertilizers, as well as broader production costs. It ensures timely access to capital, enabling clients to maintain production continuity, improve efficiency, and enhance output quality.

07

Istijrar:
Istijrar is designed to address financing gaps where traditional Murabaha is not applicable, specifically for the purchase and import of electricity. It offers a flexible, Shari'ah-compliant solution that supports reliable energy access, contributing to economic stability and continuity of essential services.

08

Supplier Financing:
Supplier Financing is a Shari'ah-compliant trade finance solution based on Wakala and Musawamah structures, providing early liquidity against deferred receivables. It establishes clear terms at the pre-shipment stage and accelerates cash flow post-shipment through receivables monetization, without involving interest-based borrowing or the sale of debt.
